7 ovarian syndrome affects approximately 1 in 10 women of child-
8 bearing age; and

9 WHEREAS, Polycystic ovarian syndrome is defined as the
10 presence of cysts on the ovaries combined with the absence of
11 ovulation; and

12 WHEREAS, While the cause of polycystic ovarian syndrome is
13 unknown, most experts believe that several factors, including
14 genetics, could play a role; and

15 WHEREAS, Polycystic ovarian syndrome can begin in the teenage

1 years with symptoms such as irregular or no menstrual periods,
2 acne, obesity, weight gain, inability to lose weight, breathing
3 problems while sleeping, depression, oily skin, infertility,
4 skin discolorations, high cholesterol levels, elevated blood
5 pressure, excess or abnormal hair growth and distribution, pain
6 in the lower abdomen and pelvis, multiple ovarian cysts and skin
7 tags; and

8 WHEREAS, Women with polycystic ovarian syndrome have a
9 greater chance of developing several serious health conditions,
10 including life-threatening diseases such as diabetes and heart
11 disease; and

12 WHEREAS, There is no known cure for polycystic ovarian
13 syndrome; and

14 WHEREAS, By changing lifestyle habits and making small
15 changes to diet and exercise, women afflicted with the disease
16 can not only feel better, but they can also improve their
17 chances of conception; therefore be it

18 RESOLVED, That the House of Representatives designate the
19 month of September 2017 as "Polycystic Ovarian Syndrome
20 Awareness Month" in Pennsylvania.
