In the case of computation of actual instruction expense per elementary teaching unit for district pupils educated in the schools of the district and for district pupils educated in the public schools of other districts within the Commonwealth, expenses of general control per teaching unit shall be calculated by dividing the foregoing listed expenses of general control of the school district by the number of teaching units based on the number of all pupils who are residents of the school district and are in average daily membership in the public schools of the Commonwealth. In the case of computation of actual instruction expense per joint elementary teaching unit and actual instruction expense per joint secondary teaching unit, expenses of general control per teaching unit shall be calculated by dividing the foregoing listed expenses of general control of the school district by the number of teaching units.
based on the number of all pupils who are residents of the
school district and are in average daily membership in the
public schools of the Commonwealth, and adding thereto the
quotient obtained by dividing the foregoing listed expenses of
general control of the joint school district by the number of
joint teaching units based on the number of pupils who are
residents of school districts that are members of the joint
school district and are in average daily membership in the
schools of the joint school district. In the case of computation
of actual instruction expense per area technical school teaching
unit, expenses of general control per teaching unit shall be
computed by dividing the foregoing listed expenses of general
control of the school district by the number of teaching units
based on the total number of all pupils who are residents of the
school district and are in average daily membership in the
public schools of the Commonwealth, and adding thereto the
quotient obtained by dividing the foregoing listed expenses of
general control of the area technical school by the number of

and each separately for elementary and for secondary schools,
per teaching unit, calculated by dividing the sums of (a), (b),
(c), (d), and (e) below by the numbers of elementary, secondary,
joint elementary, joint secondary, and area technical school
teaching units, respectively, based on the number of all pupils
on an equivalent full-time basis in average daily membership in
the public schools of the district, or joint district, or the
area technical school, or other school district within the
Commonwealth in which pupils of the district are educated, as
the case may be; (a) expenses of instruction, to include
salaries of supervisors and other expenses of supervisors,

teaching unit for district pupils educated in the elementary
grades of a laboratory school of a State-owned college and the
actual instruction expenses for secondary teaching unit for
district pupils educated in the high school grades of a
laboratory school of a State-owned college shall be computed by
(i) dividing the total amount of money paid to the State-owned

resident elementary children enrolled in a laboratory school of
a State-owned college by the number of such elementary teaching
units based on the total number of such resident children in
average daily membership in the laboratory school, (ii) dividing
the total amount of money paid to the State-owned college by the
resident district for the education of all resident secondary
children enrolled in a laboratory school of a State-owned
college by the number of such secondary teaching units based on
the total number of such resident children in average daily
membership in the laboratory school. The teaching units are
computed on the basis of thirty (30) equivalent full time

For purposes of reimbursement to a school district under subsections (d), (e), and (f) of section 2502, section 2502.8, section 2502.22, section 2502.25, section 2502.26 and section 2592, or to an intermediate unit or area vocational-technical career and technical school, shall be the Commonwealth's method of determining the combined market value and income wealth for each pupil, and shall be computed, for the school year for which reimbursement is being paid, as follows:

(a) (i) Divide the market value per weighted average daily membership of the district, intermediate unit or area vocational-technical career and technical school by the market value per weighted average daily membership of the State; (ii) Determine the product of subsection (a)(i) multiplied
by .5;

(iii) Subtract the resultant product in subsection (a)(ii) from 1.000 to determine the market value portion of the aid ratio.

(iv) For purposes of the calculation described in subsection (a)(i) through (iii), the market value of a district shall be the real property valuation of the district for the calendar year that concluded during the school year immediately preceding the school year for which reimbursement is being paid. The market value of an intermediate unit or area vocational-technical career and technical school shall be the sum of the real property valuations of each of its component districts for the calendar year that concluded during the school year immediately preceding the school year for which reimbursement is being paid. The weighted average daily membership of a district shall be the weighted average daily membership for the school year immediately preceding the school year for which reimbursement is being paid. The weighted average daily membership of an intermediate unit or area vocational-technical career and technical school shall be the sum of the weighted average daily memberships of each of its component districts for the school year immediately preceding the school year for which reimbursement is being paid.

(b) (i) Divide the income per weighted average daily membership of the district, the intermediate unit or area vocational-technical career and technical school by the average personal income per weighted average daily membership of the State;

(ii) Determine the product of subsection (b)(i) multiplied by .5;
(iii) Subtract the resultant product in subsection (b)(ii) from 1.000 to determine the income aid ratio.
(iv) For purposes of the calculation described in subsection (b)(i) through (iii), the income of a district shall be the personal income valuation of the district. The income of an intermediate unit or area [vocational-technical] career and technical school shall be the sum of the personal income valuations of each of its component districts. The weighted average daily membership of the district shall be the weighted average daily membership for the school year immediately preceding the school year for which reimbursement is being paid. The weighted average daily membership of an intermediate unit or area [vocational-technical] career and technical school shall be the sum of the weighted average daily memberships of each of its component districts for the school year immediately preceding the school year for which reimbursement is being paid.
(c) Add sixty percent (60%) of the market value aid ratio to forty percent (40%) of the income aid ratio to determine the market value/income aid ratio.
(d) For payments beginning in the 1989-1990 school year and each school year thereafter, the Department of Education shall utilize an adjusted personal income valuation for the 1987 tax year and each tax year thereafter respectively in computing the market value/income aid ratio for such districts. The adjusted personal income valuation shall be calculated by dividing the total out-of-State tax credits claimed by the residents of a school district by the State personal income tax rate and subtracting that amount from the total personal income valuation for the individual school district. The State total personal income valuation shall remain that as certified by the
