THE GENERAL ASSEMBLY OF PENNSYLVANIA

---

HOUSE BILL

No. 487 Session of  
1995

---

INTRODUCED BY RAYMOND, FARGO, FLICK, BATTISTO, BUNT, MICOZZIE,  
TRELLO, OLASZ, SHANER, CORNELL, E. Z. TAYLOR, L. I. COHEN,  
LAUGHLIN, BOYES, HENNESSEY, CIVERA, BELFANTI, MERRY AND  
SEMMELE, JANUARY 31, 1995

---

REFERRED TO COMMITTEE ON STATE GOVERNMENT, JANUARY 31, 1995

---

AN ACT

1 Providing for government-wide computer security and for the  
2 training in security matters of persons who are involved in  
3 the management, operation and use of State computers and  
4 State computer systems.

5 The General Assembly of the Commonwealth of Pennsylvania  
6 hereby enacts as follows:

7 Section 1. Short title.

8 This act shall be known and may be cited as the Computer  
9 Security Act.

10 Section 2. Statement of purpose.

11 The General Assembly declares that improving the security and  
12 privacy of sensitive information and critical data in State  
13 computers and State computer systems is in the public interest,  
14 and hereby creates a means for establishing minimum acceptable  
15 security practices for these computers and computer systems.

16 Section 3. Definitions.

17 The following words and phrases when used in this act shall  
18 have the meanings given to them in this section unless the

1 context clearly indicates otherwise:

2 "Automatic data processing equipment." Equipment or the  
3 interconnected system or subsystems of equipment that are used  
4 in the automatic acquisition, storage, manipulation, management,  
5 movement, control, display, switching, interchange, transmission  
6 or reception of data or information. The term includes  
7 electronic data processing equipment.

8 "Computer." An electronic, optical, electrochemical or other  
9 high-speed data processing device performing logical, arithmetic  
10 and storage functions.

11 "Computer system." Equipment or the interconnected system or  
12 subsystems of equipment that are used in the automatic  
13 acquisition, storage, manipulation, management, movement,  
14 control, display, switching, interchange, transmission or  
15 reception of data or information. The term includes computers,  
16 peripheral devices, software, firmware and similar procedures;  
17 and services, including support services.

18 "Computer virus." A program or set of computer instructions  
19 with the ability to replicate all or part of itself when  
20 inserted into a computer's memory, operating system, files or  
21 application programs, which may include malicious computer  
22 instructions designed to alter or destroy data.

23 "Critical data." Computer data vital to the operations of  
24 the Commonwealth or to the citizens of this Commonwealth.

25 "Designated State agency." The Office of Administration or  
26 the State agency designated by the Governor to administer this  
27 act.

28 "Disaster." An event which disrupts State computers and  
29 State computer systems beyond the point where a State agency can  
30 achieve recovery through routine recovery procedures. The term

1 includes, but is not limited to, ecological events such as  
2 storms, earthquakes and floods, accidents such as fire, power  
3 loss and communications loss and deliberate disruptions such as  
4 labor or management disputes, computer viruses and sabotage.

5 "Peripheral device." Includes a data storage facility or  
6 communications facility directly related to or operating in  
7 conjunction with a computer.

8 "Sensitive information." Information, the loss, misuse or  
9 unauthorized access to or modification of which could adversely  
10 affect the State interest or the conduct of State programs.

11 "State agency." A Commonwealth agency, as defined in 2  
12 Pa.C.S. § 101 (relating to definitions), except criminal justice  
13 agencies which maintain information which is subject to the  
14 requirements of 18 Pa.C.S. § 9131 (relating to security  
15 requirements for repositories).

16 "State computer system." A computer system operated by a  
17 State agency or by a contractor of a State agency or other  
18 organization that processes information using a computer system  
19 on behalf of the State to accomplish a State function. The term  
20 includes automatic data processing equipment.

21 Section 4. Duties of State agencies.

22 (a) Designate sensitive information.--State agencies shall,  
23 within nine months of the effective date of this act and  
24 annually thereafter, identify as part of the security plan each  
25 State computer and State computer system, and systems under  
26 development, which are within or under the supervision of that  
27 agency and which contain sensitive information or critical data.  
28 The State agencies shall identify what sensitive information and  
29 critical data is contained in these computers and computer  
30 systems.

1 (b) Security plan.--State agencies shall, within one year of  
2 the effective date of this act, establish a security contingency  
3 disaster recovery plan for State computers and State computer  
4 systems within or under the supervision of that agency. The plan  
5 shall be based upon the generic plan developed by the designated  
6 State agency. The plan shall not be considered a public record  
7 as defined by the act of June 21, 1957 (P.L.390, No.212),  
8 referred to as the Right-to-Know Law. The plan shall be  
9 implemented by the State agency upon approval by the designated  
10 State agency, and it shall be updated annually by the agency and  
11 submitted to the designated State agency by December 15 of each  
12 year. This plan shall include, at a minimum, the following:

13 (1) A process to assess the risk and an assessment of  
14 the risk of each computer and computer system within or under  
15 the supervision of that agency against disasters, including  
16 infection from computer viruses, computer-related fraud and  
17 misuse, ecological events and other disasters and a  
18 description of the action necessary to reduce and minimize  
19 the risk of such disasters and abuses. Specific attention and  
20 emphasis should be given in the plan to those actions  
21 necessary to protect sensitive information and critical data.

22 (2) Procedures for the routine backup for sensitive  
23 information and critical data.

24 (3) Procedures for computer system disaster recovery.

25 (c) Training.--State agencies shall provide for mandatory  
26 periodic training in computer security awareness and accepted  
27 computer security practice for employees involved with the  
28 management, use or operation of a State computer or State  
29 computer system that is within or under the supervision of that  
30 agency and that contains critical data or sensitive information.

1 The training shall be provided in accordance with the  
2 regulations developed pursuant to section 5(a) by the designated  
3 State agency.

4 Section 5. Duties of the designated State agency.

5 (a) Regulations.--Within six months of the effective date of  
6 this act, the designated State agency shall develop regulations  
7 pertaining to implementation of this act and the required  
8 development of the State agencies' plans, training, research and  
9 coordinated activity provided for in this act for State  
10 computers and State computer systems.

11 (b) Computer security plan.--Within six months of the  
12 effective date of this act, the designated State agency shall  
13 initiate a generic computer security contingency disaster  
14 recovery plan for use by State agencies in the establishment of  
15 the plans required under section 4(b).

16 (c) Review of plans.--The designated State agency shall  
17 annually review and approve State agencies' plans for compliance  
18 with the regulations developed pursuant to subsection (a).

19 (d) Research.--The designated State agency shall perform  
20 research and conduct studies to determine the nature and extent  
21 of the vulnerabilities of, and to devise techniques for, the  
22 cost-effective security and privacy of sensitive information and  
23 critical data in State computers and State computer systems.

24 (e) Coordination.--The designated State agency shall  
25 coordinate closely with other offices and agencies to assure  
26 maximum use of existing and planned programs, materials, studies  
27 and reports relating to computer systems security and privacy in  
28 order to avoid unnecessary and costly duplication of effort.  
29 This coordination shall include periodic meetings with State  
30 agency personnel primarily responsible for management of State

1 computers and State computer systems.

2 (f) Training.--In addition to developing regulations  
3 pertaining to training as required by subsection (a), the  
4 designated State agency shall act as a central repository of  
5 computer security training information and shall develop and  
6 provide training activity to include, at minimum, the following:

7 (1) Instruction as to the nature and character of  
8 computer viruses, computer-related fraud and misuse and other  
9 disasters.

10 (2) Enhanced awareness of the threats to and  
11 vulnerability of computer systems.

12 (3) The use of improved computer security practices.

13 Section 6. Effective date.

14 This act shall take effect in 30 days.
