General Fund	\$0	See Fiscal Impact

SUMMARY: House Bill 520, Printer's Number 923, amends the State Lottery Law (Act 91 of 1971), providing for lottery winnings intercept.

ANALYSIS: This legislation requires the Department of Revenue (DOR) to determine whether an individual winning a single prize of more than \$2,500 from the Pennsylvania Lottery is delinquent and owes state taxes. If the prizewinner is found delinquent, the amount of state taxes owed will be deducted from the Lottery winnings and paid to the Commonwealth. DOR will notify the prize winner within 30 days that the winnings will be used to satisfy or partially satisfy a delinquent state tax obligation. A taxpayer may appeal the intercept within 30 days of notification. DOR shall determine and set a fee to reflect the actual cost incurred to administer the program and deduct the calculated amount from the Lottery winnings. DOR shall annually report to the House and Senate Finance Committees the amount of delinquent tax collected under the intercept program.

This legislation shall take effect immediately.

FISCAL IMPACT: Enactment of this legislation will have no adverse fiscal impact on Commonwealth funds. To the extent that an individual who wins a Lottery prize of more than \$2,500 has a delinquent State tax liability, this program will generate additional revenues for the General Fund. According to DOR, the Lottery had 4,774 claims in calendar year 2010 of winnings exceeding \$2,500. When cross-referenced with the list of outstanding tax liabilities, DOR identified 90 individual matches which would have generated a total intercept of approximately \$173,000 in payments for delinquent tax liabilities.
