

# HOUSE COMMITTEE ON APPROPRIATIONS

## FISCAL NOTE

HOUSE BILL NO. 920

PRINTERS NO. 1059

PRIME SPONSOR: Sonney

### COST / (SAVINGS)

FUND	FY 2012/13	FY 2013/14
General Fund	\$0	\$0

**SUMMARY:** House Bill 920, Printer's Number 1059, amends the Agricultural Area Security Law to provide for wind power generation systems on preserved farmland. This legislation would take effect in 60 days upon enactment.

**ANALYSIS:** This bill amends the Agricultural Area Security Law (Act 43 of 1981) by adding the definition of "wind power generation system," which is a system designed to collect and utilize wind power, including the foundation of a wind turbine and appurtenant structures such as roads and bridges, transmission lines, substations and other related buildings or structures.

It also revises the section addressing restrictions and limitations to include language stating that an agricultural easement shall not prevent the granting of rights-of-way by the land owner for wind power systems. An owner may grant access if the following apply:

- The land consists of at least 50 acres;
- If the land consists of less than 100 acres, the wind power generation may be constructed on no more than two acres;
- If the land consists of 100 or more acres, only two acres may be used for wind power generation on the first 100 acres, plus two additional acres for every 50 acres by which the land exceeds 100 acres; and
- Any subdivision to or conveyance of the subject land containing a wind power generation system must continue to consist of 50 or more acres.

**FISCAL IMPACT:** Enactment of this bill will have no fiscal impact on Commonwealth funds. Any costs related to such projects or requests on preserved farmland would be addressed via county farmland preservation boards.
