

To the Honorable Jim Marshall, Chair, and Members of the Consumer Affairs
Committee
May 21, 2021

Dear Honorable Jim Marshall, Chair, and Members of the Consumer Affairs Committee,

I am urgently writing to you today having learned your committee will be voting on further rolling out 5G, when safe wired fiber-optic (FTTP) service that has been paid for by customers, does not carry the health hazards, the energy consumption, the insecurities, vulnerabilities and other drawbacks of wireless signals can be utilized in rural communities.

The 5G literature shows overwhelmingly that the 5G signals are harmful to biological organisms and that more and more people are becoming aware of the hazards they cause and don't want to live near cell towers or other microwave radiation emitting antennas.

I myself have been harmed from very short term exposure, within hours of activation of the smart meter on my house. Since then I experience chronic migraine headaches, tinnitus, heart palpitations, vision and hearing loss, skin cancers, and various other ailments. Others I know suffer debilitating illnesses from developing electromagnetic sensitivity to the point of being wheel chair bound.

With the option for safe utility service already paid for, I object to any and all rollout of wireless 4G and 5G in our rural area.

I am aware that long-term chronic exposure to wireless signals from 5G antennas results in real measurable harm as Dr. Martin Paul and thousands of credentialed scientists have articulated in the science literature and in signed petitions against the global deployment of wireless 5G technology and its pulsed modulated microwave signals. (See Dr. Paul's summary and evidence below this letter)

My neighbors and myself have little use for 5G radiating our farmland, cattle, children, pregnant wives, developing fetus'; this act against our nature disrespects and abuses all of us. Our rights to privacy and security must be recognized by our government whom we Americans vote in and pay to protect us from harm. More of us prefer to travel in horse drawn buggies at the pace in which we travel. Car owners respect our ways and do not pressure us. It is common to follow a tractor, or buggy in the rural areas.

We have no intention of ever owning an autonomous car, a cell phone, or smart device of any kind. Our mountain agriculture community have taken hundreds of years to evolve to this point , we pay taxes on time, and abide by the law. We are grateful for this opportunity to speak to you today.

There has been a lot of money dedicated to 5G program. Some OTARD regulations have come up for discussion. It was not meant for extreme radiation devices to go above a house. The idea of placing a 5G on my neighbors house which will emit

radiation causing harm to our families is not acceptable particularly when there is a safe alternative, one which we Americans already paid for. The idea of doing this without the consent of neighbors, or safety review is not acceptable.

Rural areas of the planet where farming culture practices take place, where families provide food from the land, where cattle, sheep, chickens thrive under the open sky eating grass and worms, should be exempt from 5G.

If individuals want it they should be able to live in a community who is in favor of it.

That community is not rural Pa. We have 5G in the heavens beaming down for those who choose it.

The idea of 5G being in all communities all over this planet reminds me of a selfish little child that wants what is not theirs. It is offensive to me. This planet is God's gift to us. Safe natural electromagnetic radiation from the cosmos will not sicken our calves , babies, loved ones, bees, birds, trees, insects. All of creation so perfectly ordered has been offered to all of us. not just some of us. How selfish to think we all want to download movies faster. How selfish to not consider the good of all. The health of us all. the harm to us all. This kind of thinking does not fit in our communities. One size does not fit all no matter how you look at this situation. Please do not force manmade 5G radiation on our community.

Sincerely,

Linda E. Beck
