Tioga County Board of Commissioners - Testimony PA House State Government Committee Redistricting October 12, 2021

Mr. Chairman and Members of the Committee:

The Tioga County Board of Commissioners wish to thank you and this esteemed committee for the opportunity to comment on the important issue of how our Congressional District will be geographically defined for the next decade. I will be brief.

The Tioga County Board of Commissioners offer no change to the geographical boundaries already established that define our political boundaries. As currently defined, all of Tioga County is included in the 12th Congressional District.

Regionally, our composition of “**rural**” needs is understood by those who represent Tioga County and surrounding Counties; and any proposal to reconstruct our area, simply to create a different geographic region, does not have justification, in our opinion.

It is, however critical in any event that our County remain as a whole in any redistricting project. For our County to be divided amongst multiple districts would create undue burden for our election officials, create confusion with our electorate, and make clear communication with our state elected officials more difficult.

We respectfully request that our Congressional boundaries, as currently defined, remain unchanged.

Thank you for your time and efforts on this most important issue.

Tioga County Board of Commissioners

Mark L. Hamilton
