

THE GENERAL ASSEMBLY OF PENNSYLVANIA

SENATE BILL

No. 1343 Session of 2015

INTRODUCED BY SCAVELLO, ARGALL, YUDICHAK, RAFFERTY, BROWNE,
VULAKOVICH AND STEFANO, JULY 28, 2016

REFERRED TO ENVIRONMENTAL RESOURCES AND ENERGY, JULY 28, 2016

AN ACT

1 Amending the act of November 30, 2004 (P.L.1672, No.213),
2 entitled, "An act providing for the sale of electric energy
3 generated from renewable and environmentally beneficial
4 sources, for the acquisition of electric energy generated
5 from renewable and environmentally beneficial sources by
6 electric distribution and supply companies and for the powers
7 and duties of the Pennsylvania Public Utility Commission,"
8 further providing for portfolio requirements in other states.

9 The General Assembly of the Commonwealth of Pennsylvania

10 hereby enacts as follows:

11 Section 1. Section 4 of the act of November 30, 2004
12 (P.L.1672, No.213), known as the Alternative Energy Portfolio
13 Standards Act, amended July 17, 2007 (P.L.114, No.35), is
14 amended to read:

15 Section 4. Portfolio requirements in other states.

16 (a) General rule.--If an electric distribution supplier or
17 electric generation company provider sells electricity in any
18 other state and is subject to renewable energy portfolio
19 requirements in that state, they shall list any such requirement
20 and shall indicate how it satisfied those renewable energy
21 portfolio requirements. To prevent double-counting, the electric

1 distribution supplier or electric generation company shall not
2 satisfy Pennsylvania's alternative energy portfolio requirements
3 using alternative energy used to satisfy another state's
4 portfolio requirements or alternative energy credits already
5 purchased by individuals, businesses or government bodies that
6 do not have a compliance obligation under this act unless the
7 individual, business or government body sells those credits to
8 the electric distribution company or electric generation
9 supplier. Energy derived from alternative energy sources inside
10 the geographical boundaries of this Commonwealth shall be
11 eligible to meet the compliance requirements under this act.
12 Energy derived from alternative energy sources located outside
13 the geographical boundaries of this Commonwealth but within the
14 service territory of a regional transmission organization that
15 manages the transmission system in any part of this Commonwealth
16 shall only be eligible to meet the compliance requirements of
17 electric distribution companies or electric generation suppliers
18 located within the service territory of the same regional
19 transmission organization. For purposes of compliance with this
20 act, alternative energy sources located in the PJM
21 Interconnection, L.L.C. regional transmission organization (PJM)
22 or its successor service territory shall be eligible to fulfill
23 compliance obligations of all Pennsylvania electric distribution
24 companies and electric generation suppliers. Energy derived from
25 alternative energy sources located outside the service territory
26 of a regional transmission organization that manages the
27 transmission system in any part of this Commonwealth shall not
28 be eligible to meet the compliance requirements of this act.
29 Electric distribution companies and electric generation
30 suppliers shall document that this energy was not used to

1 satisfy another state's renewable energy portfolio standards.

2 (b) Solar photovoltaic technology.--To meet the requirements
3 of this section, all solar photovoltaic technology within the
4 geographical boundaries of this Commonwealth shall directly
5 deliver the electricity it generates to the distribution system
6 operated by an electric distribution company operating within
7 this Commonwealth and currently obligated to meet the compliance
8 requirements contained in this act.

9 Section 2. This act shall take effect in 60 days.
